

# Eagle Cart from Llama Hardware.com

For llamas taller than 44", axle can be flipped to increase height 2".

**Wheelbase: 26" wheels, 35" o.c. wheelbase, 42" axle**  
**Seat/Floor: seat width 39", seat height 32", seat back height 40", floor height 13.5"**  
**Shafts: height 30", length (to singeltree) 60", width: back 27.5" i.d., front 18" i.d.**  
**Singletree: oak, 22" long.**

Shaft is seated securely with a pin and a tension screw with a comfortable T-handle. The pin is attached to the cart with a cable so it never gets lost.

Front of cart showing oak singletree and shafts.

Brass whip holder with oak detail

Single tree detail

"D" on underside of shaft

Cart from back showing SMV sign. Axle is 42" long, and wheelbase is 35" from the tire centers. (This cart has had the axle flipped to below the frame increasing the height 2").
